

# PENTATR@INING 2024

## HIV & OTHER CONGENITAL INFECTIONS

An Interactive Training Course

Scan to register

### Online learning

Our innovative online programme comprises 6 comprehensive and thought-provoking training modules, brought to you through the dedicated tutoring of our panel of expert trainers. The course includes a variety of real-life clinical cases, lively group discussion forums, engaging "Ask the Expert" live webinars, unique networking opportunities, and a wealth of further educational tools & resources.

**Online learning: 22th April – 14th July**

### Residential workshop

Our experienced international faculty, including many authors and tutors of the online course, will deliver a bespoke 3-day residential training workshop in September. The face-to-face course will be held at the historic venue of University of Padua, just a short distance from Venice in northern Italy. The workshop is purposefully structured in a way that maximises teacher/student interaction, encourages delegates to be proactive participants and consolidates the knowledge acquired during the online training component.

**Residential workshop: 17th-19th September**

### What you can expect

Our fully immersive course will improve the professional capacity of even the most remote healthcare workers around the globe in the management of children, adolescents and pregnant people living with HIV and other congenital infections!

Registration includes: individual password for the online course, participation in the residential training workshop (incl. gala "Networking" dinner), and final certificate of attendance!

### Registration fees

	LMIC fee	Discounted Fee	Regular Fee
Full registration (online + residential)	€150	€600	€800
Residential only	€100	€250	€350

*“Incredible modules and online resources. I will use the links provided through PentaTr@ining for the rest of my career!” - PentaTr@ining Delegate*
